PROJECTS

Portfolio — A personal build and project optimizing Bootstrap, JavaScript, HTML5, and CSS3 to display myself, projects and interest.
https://ndeisler.github.io/

Random Workout Generator — An App that incorporated REACT JS fundamentals and PERN stack. Allows user sign-up and login as well as user ability to update and delete workouts generated by the App.
https://random-workout-client.herokuapp.com/

Rick and Morty API— A project parsing through a Rick and Morty API, fetching information to display a random character and their attributes using JavaScript, HTML5 and CSS3.
https://c-137api.firebaseapp.com/?

Mars Rover API — Utilizing JavaScript to display photos, and other content generated by the Mars rovers from the NASA API.
https://github.com/ndeisler/marsRoverAPI

Giphy API — A project using React JavaScript, React Strap and styled components to generate random gifs dependent on a user's input.
https://github.com/ndeisler/giphyGeneratorAPI

JavaScript Tutorial Webpage — First webpage displaying the fundamentals of JavaScript.
https://ndeisler.github.io/tutorial-website/

CSS Morty— Using Code pen to display a one of a kind creature using the fundamentals of HTML5 and CSS3.
